1. Installation d'un serveur MSDE

Vous avez la possibilité d'installer deux versions du moteur SQL fourni gratuitement par Microsoft.

Le Microsoft SQL Express 2005 ou le Microsoft SQL Express 2008. Il est conseillé de prendre ces moteurs SQL en anglais.

Microsoft SQL Express 2005

Voici un lien vous permettant de télécharger le Microsoft SQL Server 2005 Express Edition.

http://www.microsoft.com/downloads/details.aspx?FamilyID=220549b5-0b07-4448-8848dcc397514b41&displaylang=fr

Voici une série de capture d'écran vous montrant les étapes d'installation du moteur SQL 2005.

Développez le menu « SQL Server 2005 Network Configuration ».

Sélectionnez votre instance (dans notre exemple « Pops y») et changez le statut des protocoles « Named Pipes ») et « TCP/IP » pour les activer en faisant un « clic droit – Enable » sur les dits protocoles.

File Action View Help					
SQL Server Configuration Manager (Local) SQL Server 2005 Services SQL Server 2005 Network Configuration (32bit) Q_P Protocols for POPSY30SE	Protocol Name Shared Memory Named Pipes	Status Enabled Enabled			
Protocols for POPSY31 Protocols for POPSY SQL Native Client Configuration (32bit)	ат 169/19 ат VIA	Disabled	Enable Disable Properties Help	•	

Ensuite, sélectionnez le point de menu « SQL Server 2005 Services ».

Activer le service « SQL Server Browser ». Pour cela fait un « clic droit – Properties » sur le service et dans l'onglet « Service » changer le « Start Mode » en « Automatic ».

.og On	Service	Advanced

Star	Mode		Automatic 👻
Stat	e:		Automatic
			Disabled
			Manual
Start M	lode		
The sta	rt mode o	f this service.	

Démarrez le service « SQL Server Browser » par un « clic droit – Start ».

Redémarrer le service de votre instance (dans l'exemple « SQL Server (POPSY) ») par un « clic droit – Restart ».

Une fois cette procédure effectuée, le service SQL est correctement configuré.

2. Création de la connexion ODBC vers le serveur

Afin que les ordinateurs utilisant Popsy puissent se connecter au serveur précédemment créé, vous devez, sur chaque machine, créer une connexion ODBC.

Pour cela, allez dans le « Panneau de Configuration Popsy – Outils d'administration – Source de données

ODBC» (ou lancez une invite de commande DOS (touche « windows » a du clavier + lettre « R ») et tapez la commande « ODBCAD32.EXE)

Sur l'écran de création des connexions, vous devez vous placer sur l'onglet « Source de données système » et, via le bouton « Ajouter » vous pourrez créer la connexion vers le serveur.

En cas de problème lors de la connexion, cliquez sur le bouton « Configuration client » et changez la librairie réseau en « Canaux nommés ».

Une fois la connexion réussie, vous aurez cette série d'écran.

3. Préparation du serveur pour Popsy et certification

Une fois votre serveur MSDE créé, lancez la « Configuration de Popsy ». Vous le trouverez dans le répertoire « Popsy ».

Allez dans le menu « Configuration – Connexion ».

Sélectionnez la connexion ODBC précédemment créée, cochez la case « Initialisation du server » et faites « OK ». Le mode de passe éventuel de l'instance vous sera demandé.

lom	Pilote	OK.		
MS Access Database	Microsoft Access Driver (".m	Annuler		
Popsy 30 Popsy on server	SQL Server SQL Server	Aide		
Popsy31 Systemat Software Datab	SQL Server Microsoft Access Driver (*.m		Login administrateur	
			225	640,976
Enregistrer la connexion			Popsy	SQL Ser

Cette opération préparera l'instance MSDE afin de recevoir les données de Popsy.

4. Migration des données ACCESS vers le serveur MSDE

Une fois Popsy lancé, allez dans « fichier – Connexions ».

Sélectionnez la connexion ODBC précédemment créée et faites « Ok ».

Nom	Pilote	DK
MS Access Database	Microsoft Access Driver (Annule
Popsy 30	SQL Server	
Popsy on server	SQL Server	Hote
Popsy31	SQL Server	
Systemat Software Dat.	Microsoft Access Driver (

Popsy redémarrera avec la connexion choisie.

Afin de monter les dossiers ACCESS sur le serveur MSDE, vous devez copier les fichiers composant vos dossiers dans le répertoire d'installation de Popsy d'une machine en local (ou du serveur).

Vous devez prendre les fichiers XXXSOC.MDB, XXX représentant le numéro de votre dossier.

Exemple :

Si votre dossier porte le numéro 001 dans la liste des dossiers de Popsy, vous devez copier le fichier 001SOC.MBD dans le répertoire de Popsy

Une fois cette manipulation faite, dans Popsy, faites, « Fichier – Import – Complet »

Modifier le point de menu « Fichiers de base de données » (en utilisant le bouton 📖) pour le mettre en « Systemat Software Databases »

	Pilote	UK
MS Access Database	Microsoft Access Driver (Annuler
